Summary

Software Engineer with 3+ years of experience building production web applications using React, Angular, Django, Node.js, and PostgreSQL. Proven ability to develop scalable systems, collaborate with cross functional teams, and deliver client focused software solutions. Experienced in shipping production features, improving product usability through analytics insights, and supporting modern web platforms across the full development lifecycle.

Skills

Languages: Javascript, Python, PHP

Frameworks: React, Angular, Django, Node Js, Laravel

Databases: PostgreSQL, MongoDB

Cloud and DevOps: AWS, Git, CI/CD, Docker, Rest APIs

Professional Experience

Software Engineer, Savannah Informatics - Nairobi, Kenya September 2024 – Present

- Build and maintain health informatics systems using React, Angular, Django, and PostgreSQL to support clinical and operational workflows for 2000+ healthcare providers and insurance companies.
- Implemented behavioral analytics and session replay to analyze real user interactions and uncover UX friction points.
- Lead client demos and feedback sessions to translate real world healthcare needs into product improvements.
- Partner with product managers, designers, and engineers to design and ship new features from concept to deployment.

Software Engineer, Techlup Solutions - Nairobi, Kenya July 2023 – August 2024

- Developed reusable React components and scalable frontend architecture for client web applications.
- Built backend functionality in Laravel supporting e-commerce workflows including inventory management, order processing, and payments.
- Translated UI/UX design specifications into responsive, production ready interfaces with strong cross browser compatibility.
- Worked closely with clients to gather requirements, demo features, and iterate on product functionality.

Junior Software Developer, Stream4tech LLC(Remote) December 2022 – June 2023

- Developed and maintained web applications using React, Node.js, and MongoDB.
- Built frontend components and backend APIs supporting scalable web platforms.
- Worked in distributed teams to deliver new features, debug issues, and improve performance.
- Improved system reliability by identifying and resolving performance bottlenecks across frontend and backend services.

Education

ALX Africa - Software Engineering 2020

Kabarak University - Bachelor of Commerce 2018 - 2022
